ChatGPT, ChatGPT, ChatGPT... . What is this? Scary mystery or just an illusion of mystery? Nadia Russ decided to challenge ChatGPT to get to the core, digging deep to understand how it works and if there are any humans behind this technological “sensational phenomenon”. A new book ‘Challenging ChatGPT: AI Does Not Have Its Own Brains’ by Nadia Russ uncovers secrets behind this now popular public’s toy. It offers 49 poems by ChatGPT about the well-known people, current events, and much-much more, often in a humorous manner. Nadia Russ was challenging ChatGPT with her requests to write poetry on the various subjects.

that is fully programmed by people. And it is as dangerous as the people who are controlling it. It is all about the AI owners. The people behind it keep the AI completely under control, and ChatGPT can only say what it has permission to say. There are the real people behind the AI who create for ChatGPT the guidelines and limitations, training and programming the AI. And these people have their own political views and interests, reflected in this book's ChatGPT's poetry. In this book, ChatGPT talks about self and its creators. It is describing what ChatGPT is and who those trainers and the AI creators are. The print book copies are available at Amazon US and worldwide.
